

Job Title: Fair Food for All Coordinator

Hours	21 hours/week (FTE 0.6)
Pay	£19,503.12 with 3% annual increase

About the Role

GCFN's 'Our Shared Future' project is about connecting communities in Glasgow who are making the food system kinder to people and planet, and more responsive to the needs of everyone who lives here. The project has a particular focus on increasing the resources for and availability of culturally significant food in Glasgow.

This role will be tasked with co-designing and delivering the aims and objectives of the Fair Food for All strand of the project, focused on bridging the gap between local community food practices and emergency food aid provision. The post will work closely with the Fair Food for All Project Lead and our partner organisation Glasgow Eco Trust on the following initiatives:

- Working in collaboration with pantries, community kitchens, larders and foodbanks to embed locally grown food into their services, decreasing the reliance on supermarket surplus
- Promote dignity in food aid provision through the incorporation of more culturally-significant food choices, ideally grown in and around Glasgow

This post is part of a team founded on collective decision-making. The post holder will also be expected to work independently with regular lone working and the occasional need to work on evenings and/or weekends.

Additional Responsibilities

- Work collaboratively with the Fair Food for All Lead and Glasgow Eco Trust to co-design & co-ordinate a programme of inclusive activities for the local community, such as trainings on food & climate-related topics, community meals, and How to Grow workshops
- Report on project activity, supported by the Monitoring & Evaluation Officer, incorporating community feedback into ongoing programme development
- Manage a small budget, with support from the Finance Manager
- Promote project activity, with support from the team, using platforms such as eventbrite & canva
- Lead on developing an existing community meal group into a public diner model

- Co-ordinate the development of a food growing site with the Glasgow Eco Trust
-
